

MANISCALCO[®]

Australian for Mosaics[™]

Manufacturers of fine stone, glass and metal products

G'day Mates,

In 2003, Maniscalco began supplying stone mosaics in Northern California. Over the last eight years we have been 'flat stick' (very busy) and are now circulating and distributing mosaics throughout all of America and parts of Canada.

Maniscalco's goals are to provide the highest level of service possible, as well as having unique and exciting decorative offerings. We strive to maintain superior inventories, excellent quality, and competitive pricing.

Our range and quality of merchandise allows us to meet the needs and requirements of many projects whether it is residential or commercial in the United States and around the world. We continually focus on being an international industry leader in product innovation, design and development.

We are constantly bringing in new and progressive products that set the latest trends in the market place. Our 'cracker' (great) customer service and sales representatives provide a caring level of assistance. We strongly believe that networking and building relationships with clientele is crucial when running our business.

On Maniscalco's web site you will find a 'ripper' (awesome) assortment of stone, metal and glass mosaics. Our web site is constantly being updated with our products and photo gallery installations. Clearance items, monthly overstock specials, care & maintenance, installation instructions, and technical specifications are also available for your information.

Australian Spotted Jelly Fish

We, at Maniscalco, appreciate your business and thank you for your continued support and for giving us the opportunity to work with you. We are 'keen' (look forward) to serving you in the future and are excited to be an important part of your success.

Hooroo (cheers),

Rob Maniscalco
