# Litokol unique product features and abilities

- ▶ The only product with the advantage of having three different uses:
  - \* Adhesion (setting tile), sealing(waterproof) and leveling
  - \* Completely waterproof and makes grouting stain-proof and easy to wash.
- ▶ Only product in the world that can be used in 3 different ways:
  - \* Epoxy filler for grout
  - \* Used as a setting material – R-2T class adhesive (no vertical slip on wall applications)
  - \* Decorative wall finish – covers the wall with same color as grout used in tile joints. 90 different finishes available. Can add spotlight or gold packets to glitter.
- ▶ Only Epoxy grout that is safe for the environment
  - \* Non Corrosive, non-toxic, non-hazardous to the environment
  - \* Very low VOC emissions
  - \* Product not subject to restrictions for road, sea, air and rail transportation. Bucket can be shipped UPS, only epoxy that can be shipped this way.
  - \* EC1 (GEV)Plus certification – only products with a very low volatile organic compound emission rate meet this European union certification
- ▶ Starlike grout consist of 4 collections
  - \* 150 plus colors are available
  - \* Can customize the desired effect of each color by adding Galaxy, Spotlight or Gold packets to any color
  - \* Night vision – Glow in the dark grout – works with sunlight or artificial light. Only available in certain colors
- ▶ Jewels grout – 27 colors and crystal grout
  - \* Crystal is translucent sealant specially for vitreous and artistic mosaic grouting
  - \* Allows the grouting to absorb the color of the transparent glass tiles and to change according to their color
  - \* Crystal grout is made of very fine grain glass micro- beads
  - \* Have ability to design custom colors for commercial projects
- ▶ Bacteriostatic grout material that prevents the proliferation of mold and fungi
  - \* The only epoxy sealant certified for contact with food items such as meat, dairy or flour processing tables
  - \* Approved for kitchen workshops in restaurants, fried food facilities, ovens and bakeries
- ▶ Easy to clean for applications on very rough tiles
  - \* Unlike color pigments, starlike colored quartz microbeads do not adhere to the tile surface (even the roughest non slip) and are removed by simply wiping with a sponge.
- ▶ Safe for use due to non-corrosive nature
  - \* Safe for the user and safeguards the environment. The same safety labeling as a normal cementitious product. Part B (catalyst) is a non corrosive, unlike any other epoxy on the market
- ▶ Old cement grouts can be restored quickly and definitively
  - \* Tear out old grout to a depth of at least 2mm of thickness
- ▶ Barrier against UV rays to protect grout from yellowing
  - \* The only epoxy sealant that is resistant to UV rays available on the market
