

Pilbara Habitat Wall Tiles

This wall tile is intended for interior use only in areas where freeze thaw cycles exist. These tiles conform to specific European Norms (UNE EN). The standard EN 14411:2012 provides the classification of ceramic tile according to production methods and water absorption.

These Spanish ceramic items are pressed tiles (obtained by pressing powdered raw materials in special molds) and have a water absorption higher than 10%. Accordingly, these ceramic tiles belong to Group BIII (dry pressed ceramic tiles for interior walls, with water absorption $E > 10\%$) and the Standard UNE EN 14411 L defines the methods to be used for determining the technical features of this group.

Moreover, Standard 14411 refers to the testing methods of the UNE EN ISO 10545 Standard.

CONFORMITY TO STANDARDS:

SERIES NAME	SIZES:		
Pilbara Habitat	2-1/2" x 8	3' x 12"	5" x 15-1/2"

GROUP BIII. TECHNICAL FEATURES		
ISO 10545-3	Water absorption	>10%
ISO 10545-4	Flexion resistance	>15N/mm ²
ISO 10545-11	Cracking resistance	APPROVED
ISO 10545-13	Chemical resistance	GLA
ISO 10545-14	Stain resistance	5
