

## ECO ROCK DESCRIPTION AND TECHNICAL DATA

Eco Rock (Terrazzo) pebble is a material that consists of chips of marble, granite, quartz, glass, shell or other suitable materials bonded together by a cement. This Terrazzo consists of 100% recycled material and is renewable and recyclable.

### Notes

- Terrazzo is an artisanal product; for this reason, there may be slight shades that are not considered a defect of the material but a characteristic.

### Tests results

Test	ASTM	Value
DCOF	ANSI 326.3:2017	0.66
Stain	See "installation recommendation" section	
Water Absorption	C97-02	4.1%
Bulk specific gravity	C97-02	2,376 g/cm <sup>3</sup>
Abrasion resistance	C1353/C1353M 20e1 <sup>1</sup>	54.862
Scratch resistant	MOHS	33

### Installation recommendation/Applications

- Sealing is required. We recommend a water-based water repellent treatment on all products. The sealer must be suitable for natural stone, and we suggest applying it before and after grouting.
- We recommend traditional cementitious grouts, but modern two-component epoxies can also be used by carefully following the manufacturer's instructions.
- Applications:

Material	Interior residential walls	Interior residential floors	Interior commercial	Backsplashes	Shower Wall	Shower Floor	Fireplace surrounding
Terrazzo pebbles	YES	YES	Walls only	YES	YES	YES	YES
