

Tundra Glass

Bringing you enhanced color options with a more advanced manufacturing style than before, we are happy to introduce the Tundra Glass Series. Electric kilns assist with the overall quality of the product and help aid the environment. The colors display an enchanting swirl caused by mixing the color separately into already molten glass. This process of melting components to achieve this look, translates into a unique reaction where not one piece will look the same. A soft matte finish combined with these colors will add a truly lavish look to your space.
